## Addendum No. 2

TO: DESIGN-BUILD TEAMS  
FROM: Martin Santoyo, Project Manager *MS.*  
SUBJECT: DPW PROJECT NO. 14063  
Door Security Controls and Motor Operators  
Units 15 and 16, ISCI  
Department of Correction  
Boise, Idaho

Exhibit A, verbiage clarification:

~~Delete "The Design-Builder will replace the existing detention control and intercom head-end systems with a new, PLC based touchscreen system, identical to the projects listed above. This system is the standard for the States of Alaska and Oregon, and also installed at the Pocatello Women's Prison and the ISCC facility across the street."~~

Replace with:

"The Design-Builder will replace the existing detention control and intercom head-end systems with a new, programmable logic controls (PLC) based touchscreen system. The PLC type of system is the standard for the States of Alaska and Oregon, and also installed at the Pocatello Women's Prison and the ISCC facility across the street."

The intent of this verbiage is not implying an exact replication of any particular Prison system, but rather a new PLC touchscreen system, similar to the facilities mentioned above.
