SUPPLEMENTARY INSTRUCTIONS

5.5 EMPLOYMENT PRACTICES

5.5.1 Bids shall be based on the provisions of Section 44-1001 and 44-1002 of the Idaho Code dealing with labor preference.

****USE IF PROJECT HAS PLUMBING, HEATING AND AIR CONDITIONING, OR ELECTRICAL WORK. DELETE IF NONE.**

5.6 NAMING OF SUBCONTRACTORS

5.6.1 Section 67-2310, Idaho Code, requires general (prime) contractors to include in their bid the name of the subcontractors who shall, in the event the contractor secures the contract, subcontract the plumbing, HVAC, and electrical work under the general (prime) contract. Failure to name subcontractors, as required, shall render any bid submitted by a general (prime) contractor unresponsive and void. Subcontractors named in accordance with the provisions of this section must possess an appropriate license or certificate of competency issued by the State of Idaho covering the contractor work classification in which the subcontractor is named.

The Division of Public Works requires the bidder to complete Bid Proposal Page 2 in its entirety for all categories of work listed. The Division of Public Works also requires that the general (prime) contractor name the entity that will perform the work, including if the entity is a subcontractor, a sub-subcontractor or the general (prime) contractor submitting the bid. Failure to complete Bid Proposal, Page 2 in full shall render a bid unresponsive and void.

With regard to possessing an appropriate license or certificate of competency all subcontractors listed by the general (prime) contractor must have at the time of the bid opening a current license in the appropriate category (class, type and specialty category) as issued by the Public Works Contractors State License Board. In addition, plumbing, HVAC and electrical subcontractors shall have at the time of the bid opening a valid plumbing contractor's license, HVAC contractor's license or electrical contractor's license, respectively, as issued by the Idaho Division of Building Safety.

In determining if the above listed subcontractors are required on the project, the Division of Public Works will refer to the plans and specifications. If doubt exists prior to bid closing, potential bidders should contact the Division of Public Works and the architect/engineer who prepared the plans and specifications will be requested to make the determination. If plumbing, HVAC, boiler, or electrical work is not shown on the plans and specifications, but is discovered by the bidder subsequent to the date of bid opening, then the bidder must request clarification from the architect/engineer. Absent such clarification, work will be considered incidental and naming of a subcontractor will not be required.

5.7 IDAHO DOMICILED CONTRACTORS

5.7.1 Section 67-2348, Idaho Code, requires the Division of Public Works to apply a preference in determining which contractor submitted the lowest responsible bid. If the contractor who submitted the lowest dollar bid is domiciled in a state, which has preference law, which penalizes Idaho domiciled contractors then the Division of Public Works must apply preference. The preference that will be applied is the preference law of the domiciliary state of the contractor who submitted the lowest dollar bid.

Generally speaking, a contractor's domiciliary state is the state in which the contractor's home office is located. If federal funds are involved in the project then no preference will be used.

****INCLUDE 5.8 AND INCLUDE WAGE RATES WHEN
PREVAILING WAGE RATE IS APPLICABLE**

5.8 WAGE RATES

5.8.1 Bids shall be based on applicable wage determinations and labor standards as established by the Secretary of Labor, United States Department of Labor. Refer to Federal wage determinations.

ARTICLE 6 POST BID INFORMATION

Delete paragraph 6.2

ARTICLE 7 PERFORMANCE BOND AND PAYMENT BOND

Modify and add to Article 7, the following:

In subparagraph 7.2.1, in the first sentence, delete “three days following the date of execution of the Contract” and substitute “ten days following the receipt of Notice of Intent to Award”.

7.2.2.1 Performance bond and labor and material payment bond are required for this project; each in an amount of not less than 100% of the contract amount, and issued by a surety company authorized to do business in Idaho.

DIVISION 1 - GENERAL REQUIREMENTS

In addition to the information and data contained in the bidding documents and contract documents, the following information should be included in Division 1. The Architect/Engineer should review each project to determine applicability and tailor each specification to suit the particular project. The Section breakdown and numbering is optional, but should generally follow the CSI recommended format.

Summary, Alternates, Allowances

One or more sections to include a scope of work, phases of construction, etc. Include a full and detailed description of alternates and unit prices and a listing of allowances with dollar amounts. Alternates should be kept to a minimum and must be clear, precise and independent of other alternates. Unit prices and allowances should only be used when specific requirements are not available at time of bidding, and only with the DPW Project Manager's approval. Use only add alternates unless specifically authorized elsewhere.

Project Coordination

This section should be used for requiring surveys or special recording requirements. Installer inspections prior to actual application should be required for major units of work and always for critical items like waterproofing, roofing, glazing, special coatings, etc. Pre-installation meetings should always include architect, DPW Field Representative, contractor, subcontractor and manufacturer's representative.

DPW typically requires a pre-construction meeting and monthly construction meetings. A typical format and agenda for such meetings is available in DPW Instructions to Architects and Engineers. Meetings are to be set-up, chaired and recorded by the A/E.

Under Project Coordination, several areas of responsibility and activity are herein defined:

1. The Division of Public Works Field Representative will determine the time, location and date for the Preconstruction Conference. Personnel to attend will be the contractor, sub-contractor(s), material suppliers, Division of Public Works Field Representative, Agency Representative and Architect/Engineer.
2. The Architect/Engineer is to provide minutes of the Preconstruction Conference to all concerned parties.

This section should also include coordination with existing site operations. Most DPW projects occur on state campuses and institutions, some with very restrictive access and most with continuing operations.

Cutting and Patching

This section may be required on new work and is usually required on renovation and repair projects.

Definitions and Standards

Provide as required to clarify technical sections.

Schedules, Reports, Payments

GENERAL REQUIREMENTS

GR - 1

Use if required for more detailed explanation of requirements. Require CPM or similar type scheduling for large or complicated projects. Obtain the appropriate forms from DPW for payment requests, change orders, substantial completion, etc.

Submittals

Outline procedures for shop drawing, product data, samples, etc. DPW Field Representative should be included for receipt of approved submittals.

Quality Control Services

The State typically pays the cost of normal testing to include earthwork, paving, concrete and welding. Special tests may be specified to be performed at contractor expense. Payment for retesting of failed tests should be specified to be at cost of contractor.

Temporary Facilities

For remodeling and additions, temporary utilities may be arranged for through the Owner and utility charges can be paid for by the Owner. For new construction, require the Contractor to provide and pay for temporary and construction utility costs through substantial completion. Provide for security and access as required.

Products and Substitutions

Define and outline as required including details relating to warranties. DPW prefers no substitutions after bid date except where products are unavailable within construction schedule.

Project Closeout

Outline closeout procedures. Require accurate and complete "As-Built" drawings. Require accurate record keeping and a listing of products, subcontractors, supplier and/or manufacturers. Require maintenance manuals and instructions to Owner's operating and maintenance personnel. Require complete final cleaning. Normally two copies of maintenance manuals will be required. For projects with complex equipment and systems include project finalization and start-up requirements.

****FOR PROJECTS IN IDAHO STATE BUILDING AUTHORITY BUILDINGS, INCLUDE THE FOLLOWING PROVISION PERTAINING TO WARRANTIES AND GUARANTEES.**

Contractor agrees that all warranties and guarantees of materials, equipment and workmanship to the Owner shall also be for the specific benefit of the Idaho State Building Authority and, specifically agrees for itself and all of its subcontractors and suppliers that any and all provisions of any warranty or guaranty may be enforced by the Owner, the Idaho State Building Authority or any of its assignees or successors in interest.
