ADDENDUM NO. 2

Date: June 9, 2022

Owner: Division of Public Works
 502 N. 4th Street
 Boise, ID 83702

Project: Design-Build Contractors – Thousand Springs Visitor Center – Interpretive Exhibits
 Idaho Department of Parks & Recreation (IDPR)
 Hagerman, Idaho

Project No.: DPW #20541

No. of Pages 2

NOTICE TO ALL BIDDERS

You are hereby notified of the following clarifications of and/or revisions to the Request for Qualifications for the above referenced project.

THIS ADDENDUM is hereby made a part of the project requirements and contract documents for referenced project.

BE SURE to acknowledge it in your RFQ Submittal package cover letter.

ITEM NO.

1. Questions / Answers:

Questions received to date from Firms interested in a submitting an RFQ response for DPW Project No. 20541, Interpretive Exhibits for the Thousand Springs Visitor Center.

	Question /Clarification	Answer/Response
1	Clarification regarding General Contractor required to have an Idaho Public Works License. License to be obtained prior to award of the construction contract	As stated in the RFQ, a Public Works License is not required when the RFQ response is submitted but would need to be in place if awarded the contract, during Contract negotiation. Information on obtaining an Idaho Public Works license can be found at the Idaho Division of Occupational & Professional Licenses (IDOPL): https://dbs.idaho.gov/forms-applications/public-works-forms-applications/

2	Clarification regarding the Electrical Technician required to have an Idaho Public Works License. License to be obtained prior to award of the construction contract	In addition to the response above, additional information regarding the Idaho Public Works License requirements is outlined in the Design-Build Agreement SAMPLE available on our website. https://dpw.idaho.gov/docs-forms-guides/
3	Clarification regarding a Professional Engineer of any exhibit design component to be installed by the fabricator, required to be stamped per Idaho Statutes and IBC	If an exhibit design component is required to be engineered or designed by a licensed Engineer /Architect as regulated by International Building Code. The work is to be performed and stamped by an individual licensed in the State of Idaho. Reference Idaho Statute 54-1215
4	How much of the work done by Formations is final, and how much are you comfortable with the contractor changing? Is the full-scale bronze Hagerman horse mentioned at the pre-bid meeting (Sheet 3.1 in the Preliminary Concept designs) a must?	As stated in Addendum #1, the work done by Formations is preliminary and new concepts are anticipated. The bronze Hagerman horse is something to be evaluated.
5	Would the contractor or the site staff be leading participation by the affiliated tribal nations? If the contractor, how many meetings/workshops do you anticipate being necessary?	The Design/Contractor group will be responsible for tribal communication and coordination. Site staff and IDPR roles will be as participant and support. We would anticipate consultation with the tribes at each design phase.
6	Can you please elaborate on how difficult the site is to reach and how the entry for install will work?	The site is 1-1/2 hours from Boise, ID via interstate. Hagerman is 9 miles off the interstate. There are double doors, 6' opening width, into the building and into the interpretation room.
7	Can you please confirm we would be able to secure a GC or Electrical license in 2-3 days since each state usually requires an examination even if it has reciprocity with other states?	As long as the company meets the requirements and submits a complete application packet to IDPOL, a license will be granted. Presently the Idaho Division of Occupational & Professional Licenses (IDOPL) estimates an application review period of 7-10 business days. https://dbs.idaho.gov/forms-applications/public-works-forms-applications/
8	Will braille translations be required?	Refer to NPS Interpretation and Accessibility guidelines for scope and scale of work.
9	Do we need to consider the use of t-coils, iBeacons, or will the park provide handheld devices?	The audio description will need to include devices.
10	A Canadian company inquired on whether an International SOQ bid would be accepted?	YES, a Canadian based company is eligible, but will need to have an Idaho Public Works License.
